Amendments to the Claims

Please amend claim 14 as follows:

1-13 (Cancelled)

14. (Currently Amended) Storage medium on which a set of data is stored
comprising:

whereby a first data section of said set of data is stored in a read-only
memory area of said storage medium; and

a second data section of said set of data is stored in a read/write memory
area of said storage medium, and

wherein said set of data includes language-independent data and language-
dependent data and ~~whereby~~ at least a part of said set of data can be processed in
a handling device either in a first processing form related to a first language, or in
at least one other processing form different from said first processing form and
related to a second language different from said first language,

~~and~~ wherein language-independent data and language-dependent data
which are related to said first language are included in said first data section, and
language-dependent data which are related to said second language are included
in said second data section,

and wherein for said at least one other processing form, data from said
second data section as well as data from said first data section are to be used.

15. (Previously Presented) Storage medium according to claim 14, wherein said
storage medium comprises at least one of a DVD, a CD and a Minidisc.

16. (Previously Presented) Storage medium according to claim 14, wherein said
set of data comprises a movie and the related video data and language-dependent
audio data which are related to said first language are included in said first data
section and language-dependent data which are related to said second language
are included in said second data section.

17. (Previously Presented) Storage medium according to claim 15, wherein said set of data comprises a movie and the related video data and language-dependent audio data which are related to said first language are included in said first data section and language-dependent data which are related to said second language are included in said second data section.

18. (Previously Presented) Method for processing a set of data stored on a storage medium on which a first data section of said set of data is stored in a read-only memory area of said storage medium and a second data section of said set of data is stored in a read/write memory area of said storage medium, wherein said set of data includes language-independent data and language-dependent data,

and whereby in a handling device at least a part of said set of data is processed either in a first processing form related to a first language, or is processed in at least one other processing form different from said first processing form and related to a second language different from said first language, the processing form actually used being selected by means of said handling device,

and wherein language-independent data and language-dependent data which are related to said first language are included in said first data section, and language-dependent data which are related to said second language are included in said second data section,

and wherein in said at least one other processing form, data from said second data section as well as data from said first data section are processed.

19. (Previously Presented) Method according to claim 18, wherein said storage medium comprises at least one of a DVD, a CD and a Minidisc.

20. (Previously Presented) Method according to claim 18, wherein said handling device comprises at least one of a computer, a video playback device and an audio playback device.

21. (Previously Presented) Method according to claim 18, wherein said set of data comprises a movie and the related video data and language-dependent audio data
